

afriBes

Biodiversity and ecosystem services
Towards a social network of scientific and
technical information for Africa

*Building together
a collective and distributed
intelligence*

www.afribes.net

A new media: You!

- Personal experiences
- An interactive and voluntary directory
- An open archive harvester
- Comments and proposals

A pool of resources

- Search engines connected to local and international databases, websites, blogs and scientific documents
- Awareness of scientific and research news
- Easy to use, open source and free of charge

Increase your opportunities

- Contact network and improved centrality
- Visibility at all scales, local, regional, international
- Clustering opportunities
- Find jobs, people and research opportunities

Enrich networking

- Shared experiences
- Targeted webforums and debate
- Thematic networks

Post here

your needs, comments, proposals!
